

**SOUTH DAKOTA BOARD OF TECHNICAL EDUCATION
ACADEMIC AFFAIRS
DISCONTINUATION OF NON-FUNCTIONAL ARTICULATION AGREEMENTS
MAY 25, 2023**

Over the past year, Board of Regents (BOR) and Board of Technical Education (BOTE) staff have worked with the six public universities and four technical colleges to compile and review a master index of program-to-program articulation agreements existing between the BOR and BOTE.

During the review process, Board staff requested technical college academic affairs leadership evaluate all articulation agreements adopted before January 2015 to identify whether the agreement should be discontinued or whether the technical college intended to renew the agreement in the coming years. Of the some 300 agreements that currently exist between BOR and BOTE institutions, approximately 120 are no longer functional for student transfer. Agreements may be non-functional because the agreement is for an academic program that no longer exists, outlines a significant number of courses that are no longer offered, there was some type of substantive change to an academic program's program of study that significantly impacts the agreement's viability, or the original agreement has been replaced by a successive agreement.

Typically, the BOTE does not approve new or modifications to existing institution-to-institution agreements. However, various agreements include a clause stating modifications require approval by the BOR and South Dakota Board of Education. The Board of Education, now called the Board of Education Standards, provided state-level oversight of the technical colleges until the BOTE's creation. Considering the governance transition from Board of Education Standards to the BOTE, Board staff confirmed with the Department of Education's legal counsel that the BOTE can act as the successor to the Board of Education Standards.

The proposed action that Board staff is proposing the BOTE take today is the discontinuation of the agreements outlined on the subsequent page. The BOR will take similar action at its upcoming meeting in June 2023. This action is administrative in nature to (1) ensure an accurate listing of articulation agreements between South Dakota's public universities and technical colleges and (2) ensure the intent of previous agreements is fulfilled.

Articulation agreements are vital to ensuring a smooth transition for South Dakota students as they progress from one higher education institution to another, and agreements play a critical role in guaranteeing the seamless transfer of credits. The partnership between the BOR and BOTE is strong, and both systems are committed to developing new agreements accurately reflecting the needs and expectations of South Dakota students, communities, and industry partners.
